Aufbau der Nukleinsäuren DNA und RNA

Nov 30-17:18

This interactive activity allows users to build DNA and RNA strands. A yellow box at the top right contains the instruction: "Baue mittels Drag & Drop DNA und RNA Stränge!". On the left, there are two columns of components. The top column shows individual nucleotides: Thymine (blue), Cytosine (red), Guanine (orange), Adenine (green), and Uracil (purple), each with a pink pentagon representing the sugar. The bottom column shows pre-assembled nucleotides with the base attached to the sugar. The background shows a partially constructed DNA double strand.
